PRACTICE INTELLIGENCE

### DocuMed Electronic Clinical Office

At DocuMed, we believe that effortlessly generating clear, concise medical documentation that accommodates your charting style and workflow is just the first step of a multi-component process that encompasses the Electronic Clinical Office (ECO). DocuMed has continually perfected the art of capturing and generating patient encounter data with templates that incorporate text, voice recognition, voice dictation and point-and-click technology since 1988.

DocuMed set its targets beyond traditional EMR to realize a comprehensive ECO. Applying physician experiences with EMR's, we developed the most complete and well thought out electronic medical documentation management tool available. DocuMed efficiencies are most apparent when observed in a real setting. Eliminate the stress and confusion. We invite you to learn more about the DocuMed Electronic Clinical Office and the many benefits of generating, managing and distributing electronic medical documentation. Request a demonstration today.

#### DOCUMED, INC.

2723 South State Street  
Suite 150  
Ann Arbor, Michigan 48104

Phone: 800-321-5595  
E-mail: [info@documed.com](mailto:info@documed.com)

The DocuMed technology is based on the Microsoft family of products including Microsoft SQL Server and Microsoft Server..

## **Electronic Clinical Office ... Beyond EMR !**

DocuMed will maximize the efficiency of all of your resources, the most valuable of which is your time. DocuMed's simple yet powerful design tools instantly transfer your preferred clinical documenting processes into an electronic environment. The intuitiveness of the DocuMed program is apparent from the moment it is launched. Electronically capturing the patient encounter at the point of care is as easy as defining the flow that best suits you and your specialty. Physicians and practices each have unique ways of accomplishing clinical charting and DocuMed accommodates every nuance. DocuMed is developed to assimilate your thinking, resulting in what-you-think-is-what-you-get. It's that straightforward.

### **Intuitive Navigation and Display Layout**

All of the patient's relevant information is presented on one screen, eliminating the need to click multiple buttons to get an overview of the patient's visit history. DocuMed understands the importance of quick access on a single screen. We also know the value of getting what you want instantly without having to constantly navigate back to a main anchor screen. Informed decision making is at your finger tips.

### **EMR and Electronic Clinical Office Document Generation**

Your clinical documentation is only as good as the tools and processes that make it happen. DocuMed takes the pain out of creating templates and flowsheets. DocuMed is totally in sync with your vision of the way it should be.

### **Paperless Workflow and Electronic Document Management**

Nothing could be more important than knowing that the diligence you practice seeing patients results in complete and comprehensive clinical documentation. We know that it takes an entire office to pull it all together. With DocuMed's automated processes you can have peace-of-mind knowing that all of the contributory components essential to comprehensive documentation have been collected by you and your staff, dictation has been transcribed, items are ready for review and the final encounter and other ancillary documents are waiting to be electronically signed-off and distributed.

### **Document Distribution Management**

Have you ever wondered whether that consult or referral letter was ever sent? How about the request for documentation from the patient's lawyer? With DocuMed you can stop wondering and know that it was sent, how it was sent and that it was sent expeditiously and only to those authorized by the patient.

### **Electronic Chart Embedded Dictation and Speech Recognition**

Dictate directly into the chart to create a .WAV file to be transcribed later or directly create notes in the chart using speech recognition software from Dragon Naturally Speaking.

### **Fully Integrated Clinic and Provider Appointment Scheduler**

DocuMed makes scheduling and tracking patients a breeze. Integration allows a provider to select the patient right off the schedule to review their chart or access any other patient information. The exam can also be launched directly from the schedule eliminating unnecessary name searches and screen changes.

### **Integrated Document Scanning**

Sophisticated scanning is included with DocuMed. No need to acquire a costly add-on product from a third party and integrate it. Scanning is already integrated into DocuMed. With equipment from our partners at Ricoh-Lanier, scanning is totally automated. Incoming faxes are automatically converted to Adobe .PDF format and ready to be reviewed and attached to the patient's chart, available to be retrieved at anytime. Batch or individual scanning of incoming hardcopy patient documents has never been more efficient.

### **Prescription Writing**

DocuMed addresses the most pressing issues on physician's minds today regarding prescription writing. Can I quickly generate a prescription, print the prescription or transmit it electronically to the pharmacy and access the patient's prescriptions from anywhere for review and renewal? With DocuMed, you can.

### **Claims and Billing Information**

DocuMed knows that ensuring the proper claim information gets to your billing system or billing entity is critical to the financial success of your practice. With DocuMed you can rest assured that complete and reliable billing information is captured and transferred.

### **Integrated Outcomes Analysis and Querying Tool**

Having a simple to use data analysis tool to instantly probe patient, practice or provider data is essential when making medical or business decisions. Data analysis can be performed within the DocuMed program for quick and insightful views of data. Or other MS SQL Server compatible querying tools may be used.
